JOURNAL OF SCIENCE & TECHNOLOGY

INDEX TO VOLUME 38, 1971

THE GENERAL ELECTRIC COMPANY LIMITED

INDEX

volume 38, 1971

Inclusive page numbers for the year's issues are:

No. 1 ..... 1 to 44
No. 2 ..... 45 to 92
No. 3 ..... 93 to 140
No. 4 ..... 141 to 184

PAGE

B

Bearing—The taper-land sector-shaped thrust 83
Bilithic quartz-crystal filter—The 74
Broadband signals—Digital coding of 151

C

Ceramics for microwave applications—Low-loss temperature-stable dielectric 8
Circuit-breaker performance requirements for higher-voltage systems 142

D

Diesels—Increased rating of: two-stage turbocharging on a medium-speed four-stroke engine 108
Diffusivity — Rapid measurement of thermal, using a modulated electron beam 102
Digital coding of broadband signals 151
Digitally modulated carrier system—Problems of receiver-filter design for a 174
Dispersive filters—Gratings for 9

E

Electron guns — Glow-discharge, for high-power heating 15
Electronics industry—Modern production testing in the 167
Epoxy-novolak-bonded high-voltage machine insulation—Material requirements for 157

PAGE

F

Ferrites—Microwave loss in polycrystalline: the role of spin waves 55
Filter—The bilithic quartz-crystal 74
Filter design—Problems of receiver-, for a digitally modulated carrier system 174
Filters—Gratings for dispersive 9
Fluorescent lighting equipment—The suppression of radio interference from 31
Frequency-selective networks suitable for microelectronic realization 128

G

Glow-discharge electron guns for high-power heating 15
Gratings for dispersive filters 9

H

Higher-voltage systems—Circuit-breaker performance requirements for 142
High-power heating—Glow-discharge electron guns for 15
High-power thyristors—Improving the turn-on performance of: some recent advances 2
High-voltage machine insulation—Material requirements for epoxy-novolak-bonded 157
Homopolar machines—Practical: use of liquid-metal slip-rings 46
Hot-rolling of steel slabs: the problem of turn-up and turn-down 63

PAGE

I

Improving the turn-on performance of high-power thyristors: some recent advances....2
Increased rating of diesels: two-stage turbo-charging on a medium-speed four-stroke engine....108
Insulation—Material requirements for epoxy-novolak-bonded high-voltage machine....157
Insulation for outdoor applications—Silicone elastomeric....124

L

Large steam turbines for nuclear and conventional power stations....21
Liquid-metal slip rings—Practical homopolar machines: use of....46
Low-loss temperature-stable dielectric ceramics for microwave applications....8

M

Material requirements for epoxy-novolak-bonded high-voltage machine insulation....157
Meter—Road pricing for motor vehicles: two designs for a self-contained....37
Microwave applications—Low-loss temperature-stable dielectric ceramics for....8
Microwave loss in polycrystalline ferrites: the role of spin waves....55
Microelectronic realization—Frequency-selective networks suitable for....128
Modern developments in public telephones: protection from vandalism....118
Modern production testing in the electronics industry....167
Monitoring systems—Vehicle-location, for fleet operators....94

N

Networks—Frequency-selective, suitable for microelectronic realization....128
Nuclear and conventional power stations—Large steam turbines for....21

P

Power stations—Large steam turbines for nuclear and conventional....21
Practical homopolar machines: use of liquid-metal slip rings....46
Problems of receiver-filter design for a digitally modulated carrier system....174
Public telephones—Modern developments in: protection from vandalism....118

PAGE

Q

Quartz-crystal filter—The bilithic....74

R

Radio interference from fluorescent lighting equipment—The suppression of....31
Rapid measurement of thermal diffusivity using a modulated electron beam....102
Road pricing for motor vehicles: two designs for a self-contained meter....37

S

Silicone elastomeric insulation for outdoor applications....124
Spin waves—Microwave loss in polycrystalline ferrites: the use of....55
Stored-program control equipment for London telephone system....62
Suppression of radio interference from fluorescent lighting equipment—The....31
Synopses....44, 92, 140, 184

T

Taper-land sector-shaped thrust bearing—The....83
Technical Literature....43, 91, 139, 182
Telephones—Modern developments in public: protection from vandalism....118
Testing—Modern production, in the electronics industry....167
Thermal diffusivity—Rapid measurement of, using a modulated electron beam....102
Thyristors—Improving the turn-on performance of high-power: some recent advances....2
Turbines—Large steam, for nuclear and conventional power stations....21
Turbocharging, two-stage, on a medium-speed four-stroke engine—Increased rating of diesels....108
Turn-up and turn-down—Hot-rolling of steel slabs: the problem of....63

V

Vehicle-location monitoring systems for fleet operators....94
Vehicles—Road pricing for motor: two designs for a self-contained meter....37
